## FEATURES

### Pearl Feature

During the Pearl Feature, each reel gets split in the middle, so the Table switches to a 6-reel 3-row table. The feature is triggered when 6 pearls land on the reels, the triggering double Pearls transform into single pearls and get placed accordingly on the new reels. The Pearls are sticking during the feature. Each new Pearl resets the remaining Free Spins to 3 during the Pearl Feature. The Pearl Feature ends when all Free Spins are played, or all positions are filled with pearls. If all positions are filled with Pearls, the MEGA Prize is triggered, which is 1000 x bet.

### Pearl Upgrades

This can only occur during Free Spins. At the end of a spin, every new Pearl upgrades other Pearls in either the same reel, row or both. Every upgrade increases the Pearl value.
