FEATURES

Floating Wilds

When two or more Wild symbols land on the reel, players are granted a respin during which those Wild symbols ascend and soar off the sides of the reels. Following the respin, the Wild symbols ascend once more and glide over the reels, adhering to random positions.

If additional Wild symbols appear on the reel, players receive another respin, during which all Wild symbols take flight over the reels. This process persists until players obtain one or no Wild symbols during the respin, or until the reels are completely filled with Wild symbols.

Hold n Spin Feature

5 or more special symbols trigger the Hold n Spin feature. These symbols will stick during the feature while all other symbols disappear. 3 Free Spins will be rewarded by collecting more special symbols to win big.

There will be a multiplier meter and every new special symbol which lands during the feature, increases the multiplier meter.
