TOP BAR FEATURE : The bar on top of the reels display three characters - Ragnar, Freya and Harald. Winning clusters fill the bar proportional to cluster size. When a character section gets filled the corresponding feature will be executed at the end of the round. If more than one section gets filled, features will be executed in the same order they were displayed in the bar. The features order is randomly generated at the beginning of every round.

RAGNAR FEATURE: RAGNAR turns random tiles into Wilds.

FREYA FEATURE: FREYA removes the low-paying symbols from the screen, cascades and the first respin brings only high-paying symbols to the screen.

HARALD FEATURE: HARALD destroys all symbols in an X pattern, thus issuing a cascade and respin. Scatter Symbols are not destroyed by this feature.

WHEEL BONUS: Three Hammer Scatters activate the WHEEL Bonus. The first three levels of the wheel present a stake multiplier win or the possibility to climb up the wheel. The multipliers increase with the level, the highest being on the fourth level.

FREE SPINS: 3 Free Spins Scatter symbols award 7 Free Spins. 2 further Free Spins are awarded for each additional Scatter over the 3 minimum required. In Free Spins every time a character feature is executed a global win multiplier increases. The multiplier doesn't reset until the end of the bonus round. Each Free Spins Scatter symbol that lands during the Free Spins bonus awards 1 additional Free Spin.

At the beginning of every round of Free Spins the first section of the Feature Bar gets filled, granting at least one character feature every Free Spin.
